

For this project, I have chosen Kali Linux as a VM.

This is a simplified diagram of what I am trying to achieve

After selecting Kali linux I installed Wazuh on it. The following screenshot shows the Wazuh Dashboard.

**Step by step process for my tasks:**

**Build MON01 →**

**successfully open Wazuh →**

**connect APP01 →**

**Deploy wazuh Agent →**

IF that works,

**FIM Windows →**

**pfSense→**

**backup monitoring.**
